

CARBON 2MTM
Activated Charcoal

What Farmers are Saying

Scours:

I use superfine powder added to a drench, and give calves 2 tsp twice a day for three days. Their scours were healed. (V. Luther, Craik)

Coccidiosis:

When calves are under stress at weaning time, I add about 10kg for 34-40 head (at 550-650 lbs) to my 200-bushel creep feeder. It will last me about 2-3 weeks and virtually eliminates coccidiosis. (V. Luther, Craik)

Diarrhea:

My bull was emaciated from diarrhea, so as a last resort I fed him about 2 cups of fine Carbon 2M twice a day for two weeks, and when I saw improvement, I dropped it to about 1 ½ cups a day for another two weeks. He eventually recovered completely and the vet didn't recognise him as the same animal. (J. Jenson, RM of Sherwood)
